

SECURED MEDICAL SIGN-IN

ABSTRACT

A method for concealing displayed confidential information includes providing one or more publically accessible displays and one or more private displays, receiving confidential information, displaying at least a portion of the confidential information at the private display, and displaying at least a portion of the confidential information at the publically accessible display for an amount of time determined by an occurrence of an event where the event includes at least one of an expiration of a time period and a user request. The method can also include sending a notification signal where the notification signal can be sent to a health care professional and storing at least a portion of the confidential information. The method can also include concealing at least a portion of the confidential information at the publically accessible display where the concealing step is responsive to a user request.
